

SECURE NEXUS

Your digital defence partner.

NEXUS 365 SHIELD

Fortify your Microsoft 365 environment with continuous protection, best-practice configuration, and comprehensive security monitoring for enhanced organisational resilience.

[» Secure Nexus Solutions](#)

Build on that resilience with Nexus 365 Shield, a managed service that hardens, monitors, and safeguards your Microsoft 365 tenant using proven security frameworks and continuous oversight.

Microsoft 365 is the backbone of collaboration and communication for most organisations but misconfiguration and weak identity controls make it a prime target for cyberattacks.

Nexus 365 Shield is a managed hardening and monitoring service that locks down your Microsoft 365 tenant using best-practice security baselines, continuous monitoring, and integrated protection tools from Secure Nexus.

Built on the foundations of our proven Nexus Protect suite, Nexus 365 Secure combines Microsoft-native controls, advanced automation, and 24x7 oversight to deliver true defence-in-depth for your cloud productivity environment.

Key Objectives

- Eliminate risky default configurations.
- Strengthen identity and access controls.
- Protect data from unauthorised sharing and exfiltration.
- Enhance visibility, detection, and response.
- Align with ISO 27001, Cyber Essentials Plus, and NCSC-recommended CIS Benchmarks

Secure Nexus Microsoft 365 Security Hardening protects your environment with best-practice configurations, monitoring, and awareness, reducing risk and ensuring compliance.

Core Service Components

- **Identity & Access Hardening:** Enforce MFA for all accounts, including admins. Use Conditional Access based on location, device compliance, and risk. Enable passwordless authentication where possible. Restrict global admin roles with least-privilege principles.
- **Email & Collaboration Security:** Advanced anti-phishing and malware filtering via Secure Nexus Email Security. Configure DMARC, DKIM, and SPF for domain protection. Apply Safe Links and Safe Attachments across Exchange, Teams, and SharePoint. Enforce DLP for sensitive data.
- **Endpoint & Device Security:** Deploy EDR/anti-virus from Nexus Protect on all endpoints. Ensure compliance via Intune policies, encryption, and patch baselines. Conduct device posture checks linked to Conditional Access.

• Backup & Data Resilience:

Continuous Microsoft 365 backup (Exchange, SharePoint, OneDrive, Teams) with immutable storage. Enable rapid recovery from ransomware, deletion, or insider threats.

• Threat Detection & Monitoring:

24x7 oversight from Secure Nexus SOC (Gold tier). Continuous alert correlation and triage for Microsoft 365 events. Integrate with Defender for Cloud Apps, Identity, and Office 365.

• Awareness & Credential Protection:

Ongoing security training and phishing simulations reduce human risk. Dark Web scanning monitors exposed credentials. Conduct user risk scoring and targeted micro-training for at-risk staff.

Benefits

- **Secure by Default:** M365 configured to Microsoft and NCSC best practices.
- **Continuous Assurance:** Ongoing monitoring, auditing, and reporting.
- **Human & Technical Defence:** Combines awareness, automation, and expert oversight.
- **Compliance Alignment:** Supports ISO 27001, Cyber Essentials Plus, GDPR, and DPA 2018.
- **Managed by Experts:** Delivered by Secure Nexus' UK-based cloud security specialists.

At Secure Nexus, our mission is to empower small and medium-sized businesses with affordable, reliable, cutting-edge cybersecurity solutions.

We are dedicated to fortifying digital assets, connecting operations securely, and defending infrastructure against evolving cyber threats.

At Secure Nexus, we help your business navigate the digital landscape with confidence, ensuring your data and operations are always protected.

Our commitment is to make cybersecurity accessible, reliable, and tailored to each client. Together, we create a resilient foundation for your business in the digital age.

Why Work With Us

- **Security is in our DNA:** Trusted UK-based partner focused on measurable improvement and risk reduction.
- **End-to-End Managed Service:** From training delivery to progress reporting and dark web monitoring.
- **Continuous Improvement Model:** Data-driven insights into human risk and training effectiveness.
- **Tailored for SMEs & Public Sector:** Practical, accessible programmes that scale with your needs.
- **Tangible Results:** Measurable risk reduction, stronger compliance posture, and greater user accountability.

At Secure Nexus, our values guide everything we do. They drive our decisions, shape our culture, and ensure we deliver security with confidence, integrity, and impact.

					
Secure with Impact	Own It, Together	Keep It Authentic	Stronger as One	Think Bold, Act Smart	Never Stop Growing
We don't just protect systems; we build trust and peace of mind.	Accountability strengthens both our team and yours.	Honesty and integrity drive every interaction.	Collaboration fuels resilience and innovation.	We embrace creativity and calculated risks to solve challenges in new ways.	We learn and adapt continuously to stay ahead of threats.

SECURE NEXUS

Your digital defence partner.

Ready to take the first step towards stronger security?

Don't wait for a breach to expose your business. Let's identify your vulnerabilities today, and close them before attackers find them.
